Dr S G Lisansky
Dr Esther F Hunter

July 2008

TABLE OF CONTENTS

OBJECTIVE	1
BACKGROUND	1
METHOD	1
WHAT DO WE THINK?	2
WEIGHT MANAGEMENT.....	2
POST PRANDIAL LIPEMIA	2
SAFETY	3
RECOMMENDATION	4
PRINCIPAL FINDINGS	5
SORBITAN MONOLEATE.....	5
POST PRANDIAL LIPEMIA (PPL).....	5
WHAT WILL REDUCE PPL?.....	6
<i>Exercise</i>	8
<i>Nutrition & Diet</i>	8
<i>Exercise and Omega fatty acids</i>	9
<i>Omega Fatty Acids & Fish Oils</i>	9
<i>Soluble fibre</i>	10
<i>Dietary Antioxidants</i>	10
<i>Green Tea</i>	10
<i>Genetics</i>	10
<i>Statins</i>	10
<i>Statins and stanols</i>	11
<i>Orlistat</i>	11
<i>Ciprofibrate</i>	11
2 CONTACTS	12
CLINICAL TRIALS.....	15
PAPER ABSTRACTS CITED IN THE TEXT	18
1 <i>Postprandial lipaemia, metabolic syndrome and LDL particle size in urbanised South African blacks with and without coronary artery disease</i>	18
3 <i>Clinical Relevance of Postprandial Lipaemia</i>	19
4 <i>Postprandial lipaemia – the influence of diet and its link to coronary heart disease</i>	19
5 <i>Exercise and postprandial lipaemia: effects on peripheral vascular function, oxidative stress and gastrointestinal transit</i>	20
6 <i>Effect of prior exercise on postprandial triglycerides in overweight young women after ingesting a high-carbohydrate meal</i>	21
7 <i>Aerobic exercise alters postprandial lipemia in African American versus White women</i>	22
8 <i>Effects of exercise at different times on postprandial lipemia and endothelial function</i>	22
9 <i>Effects of continuous versus accumulated activity patterns on postprandial triacylglycerol concentrations in obese men</i>	23
10 <i>Dietary strategies for improving post-prandial glucose, lipids, inflammation, and cardiovascular health</i>	23
11 <i>Exercise plus n-3 fatty acids: Additive effect on postprandial lipemia</i>	24
12 <i>Fish oil in combination with high or low intakes of linoleic acid lowers plasma triacylglycerols but does not affect other cardiovascular risk markers in healthy men</i>	24
13 <i>DHA + EPA for Cardiovascular Health</i>	25
15 <i>Effect of dietary antioxidants on postprandial endothelial dysfunction induced by a high-fat meal in healthy subjects</i>	27
16 <i>Multifunctional effects of green tea catechins on prevention of the metabolic syndrome</i>	28
17 <i>Influence of genetic factors in the modulation of postprandial lipemia</i>	29
18 <i>The effect of statins on postprandial lipemia</i>	29

19	<i>Effects of a stanol-enriched diet on plasma cholesterol and triglycerides in patients treated with statins.</i>	29
21	<i>Effect of orlistat on postprandial lipemia, NMR lipoprotein subclass profiles and particle size.</i>	30
22	<i>Ciprofibrate Therapy Improves Endothelial Function and Reduces Postprandial Lipemia and Oxidative Stress in Type 2 Diabetes Mellitus</i>	31
